The medication is benign if administered to someone.

The medication reverses a dose of opioids.

Narcan will save the life of someone who takes an overdose. It will result in a precipitated withdrawal. If you give it to someone, the procedure is to call 911 to handle the patient when they wake up from the dose of Narcan.

The Narcan is safe to have in schools.

There would be an age minimum and appropriate precaution in place for training students.

Narcan preserves the greater good. No one deserves to die.
